

## ABSTRACT OF THE DISCLOSURE

The present automated contract engaging apparatus provides an easy, speedy way of contract engagement. The apparatus has a display, a display controller, and a contract processor. The display controller controls the display so as to show on its screen a primary input screen image, through which the personal data of a representative customer of the group is to be input as first registration data, and an auxiliary input screen image, through which at least the name of each of the remaining customers of the group is to be input as second registration data; and the contract processor processes and executes the single collective contract or the individual contracts with respect to the plural customers based on the first registration data input through the primary input screen image and the second registration data input through the auxiliary input screen image.
